

I do not want anyone to call me at my home soliciting their business to me. if I want something I know where to get it. there is a reason we have our names on a "no call list" we don't want to be bothered. when i get home i have had enough of people and what they want! i do not want to answer the phone for just to hang it up again. i am buisy doing what needs to be done for the next day. it should be considered harassment for phone soliciting. i remember the phone calls before this act went into action, i hated it every time the phone rang soliciting should be illegal straight-out for everybody! it is nice and quiet now,i enjoy that! if this gets passed i will have my phone removed and find another form of communicating to those i need to. thanks,craig frodge
